

HEATIT EXTERNAL ROOM SENSOR WHITE RAL 9003

External room sensor NTC 10kΩ

Art.no	5430131
GTIN	7071236016496

Heatit External Room Sensor is an external room temperature sensor designed for indoor temperature measurement. The sensor is intended for use with Multireg and Heatit thermostats, including products in the Heatit DIN Rail series, offering flexible temperature measurement options for various rooms and installations.

The sensor can be mounted directly on a wall or over a standard European wall box. It is compatible with most frame systems adapted to System 55, making it easy to integrate into both new and existing installations. The matt finish provides a discreet and modern appearance.

When installed alongside thermostats, dimmers or other devices that generate heat, it is recommended to mount the sensor below these devices. This reduces the risk of heat from adjacent products affecting the temperature measurement, contributing to more accurate temperature regulation.

The sensor is designed for individual connection. Multiple sensors cannot be connected in series or in parallel.

PRODUCT FEATURES

- Application Indoor use
- Product type External room temperature sensor
- Function Room temperature measurement
- Compatibility Multireg and Heatit thermostats, including the Heatit DIN Rail series
- Mounting Wall mounting / standard European wall box
- Frame system System 55 compatible
- Colors White RAL 9010, White RAL 9003 and Black
- Series connection Not supported
- Parallel connection Not supported

ADDITIONAL INFO

IP Code	IP21
Certification	Reach, RoHS
EN Standards	CE
Warranty international	2 years
Customs number	90329000
Country of origin	CN

PRODUCT DIMENSIONS

Product length	90mm	Product width	90mm
Product height-/depth	30mm	Product net weight	80g

MAINTENANCE

The device is maintenance-free. Indoor use only.

ADDITIONAL INFORMATION

Cross-section cable: Ø1.5mm2

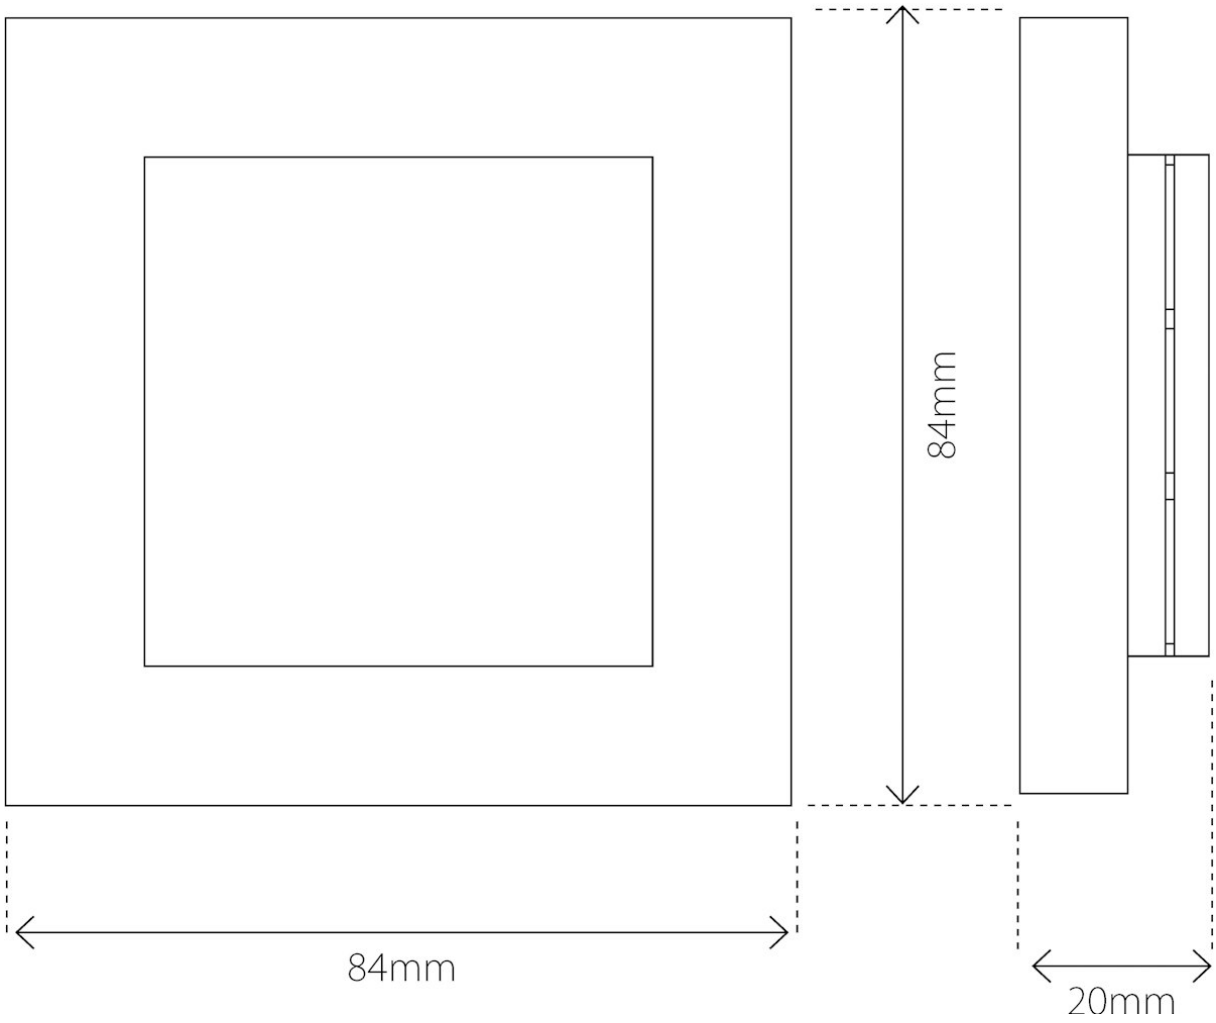

RETURN AND RECYCLING

The product must be recycled as electronic waste.
