

DATA SHEET

Document generated 27. Oct 2025 kl. 16:46

PRODUCT FEATURES

- Internal room sensor
- Floor sensor
- Temperature limiter
- 2 modes; Heat and Cool
- Hysteresis 0.5C 10C
- Temperature calibration
- ZeroX™ Detection
- · Open window detection
- · Relay status icon

THE DAY OCT AT DATA

- External room sensor (wired by cable)
- · Backup battery for internal clock

- Single poled switch
- · Lock mode/child lock
- Anti-freeze
- Works with NO and NC actuators
- · Weekly schedule
- · Adaptive function
- Internal clock
- · Active power metering

| PRODUCT DATA | |
|--------------------------------------|-----------------------|
| Ambient temperature range in use | 5 to 40°C |
| Ambient temperature range in storage | -30 to 70°C |
| Min/max installation temperature | 5 to 40°C |
| Min. and max ambient humidity (RH%) | 10 to 85% |
| Material | Polycarbonate (PC) |
| Colour | White RAL 9010 |
| Mounting | European Junction Box |

| THERMOSTAT DATA | |
|------------------------------------|------------------------------------|
| Regulation temperature | 5 to 40°C |
| Compatible NTC-sensors (kΩ @ 25°C) | 6.8, 10, 12, 15, 22, 33, 47, 100 |
| Temperature sensitivity | ±0,5 |
| Error margin temperature | 0,5 |
| Hysteresis | 0,5 to 10 (default hysteresis 0,5) |
| Ohm value at 25°C | 10kΩ |
| Max length of NTC sensor | 15m |
| | |

| ADDITIONAL INFO | |
|------------------------|-------------|
| IP Code | IP21 |
| Certification | Reach, RoHS |
| EN Standards | CE |
| Warranty international | 2 years |
| Customs number | 90321000 |
| Country of origin | CN |

HEATIT PRO WHITE RAL 9010

Thermostat 3600W 16A

5430581 Art.no

GTIN 7071236019039

Heatit Pro is an electronic thermostat designed for electrical heating, water based heating control and cooling systems. The thermostat has a user-friendly interface that can be controlled via the buttons on the front of the thermostat, it complies with the Eco-Design directive and has an easy-to-read LCD display.

Heatit Pro has 2 modes: Heat and Cool.

The thermostat fits in standard European junction boxes and may be used with most System 55 frames. It has a sturdy metal frame for secure fastening on the junction box. The thermostat has one built-in room temperature sensor. Two additional external temperature sensors may also be connected.

Heatit Pro has the option of a weekly schedule and open window detection.

The product has implemented ZeroX[™] technology. This technology makes sure the relay switches at 0V when turning on and off. With this technology the thermostat will have a much longer lifetime.

Heatit Pro has active power metering, which allows the user to see the real time power consumption.

The thermostat can withstand a resistive load of up to 16A/3600W at 230VAC. For loads above 13A, we recommend using a contactor. The thermostat is designed for resistive loads. When using large resistive, capacitive, or inductive loads, a contactor should be used.

| IOT / SMART HOME SPECIFIC DATA | |
|---------------------------------------|--|
| Alternate IoT-communication protocols | No alternative communication protocols |
| Push buttons | 3 |
| Temperature measurement range | 5 to 40°C |

| ELECTRO TECHNICAL DATA | |
|-----------------------------------|---------------------------|
| Voltage | 230VAC 50Hz |
| Voltage Output | 230VAC 50Hz |
| Grounding | No |
| Switch type | One-pole switch |
| Max load (resistive load) | 3600W |
| Max load (resistive load) | 16A |
| Connection terminals diameter | 0.2 to 2.5mm ² |
| Max tightening torque connections | 2N·m |
| Connection type | Screw clamps |

| PRODUCT DI | MENSIONS |
|------------|----------|
|------------|----------|

| Product height/diameter | 52mm | Product Width | 84mm |
|-------------------------|------|--------------------|------|
| Product length | 84mm | Product net weight | 160g |

MAINTENANCE

The device is maintenance-free. Indoor use only.

ADDITIONAL INFORMATION

Approved for use in bathrooms.

ZeroX™ Detection is pronounced Zero Cross Detection.

Heatit Controls AB declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

RETURN AND RECYCLING

The product must be recycled as electronic waste.

DISCLAIMER

The thermostat can withstand a resistive load of up to 16A/3600W at 230VAC. For loads above 13A, we recommend using a contactor.

Never change the front from one thermostat to another.

General info;

Worth noting regarding correct installation of thermostats.

When two or more thermostats are mounted too close to each other, the heat they emit, can interfere with the temperature sensors and the temperature in the junction box becomes too high. This can cause inaccurate temperature readings, especially under high load, leading to incorrect heating control. To avoid such issues, thermostats should be installed as far apart as possible and always in separate junction boxes. This ensures more accurate temperature readings.

In multi-frames with multiple units, the thermostat should always be mounted at the bottom, and no more than one thermostat should ever be installed in a multi-frame.

We develop and design our products according in accordance with our strict quality requirements (ISO 9001) and environmental requirements (ISO 14001).

All electrical installations must be carried out by an authorized electrical installer. The product must be installed in accordance with our installers manual and national building codes. Any wrongful installation, misuse, damage of the product, is not covered under warranty.

Updated documentation is available at www.heatit.com and/or documents.heatit.com

Heatit Controls AS can not be held liable for any type of errors or omittances in our product information.

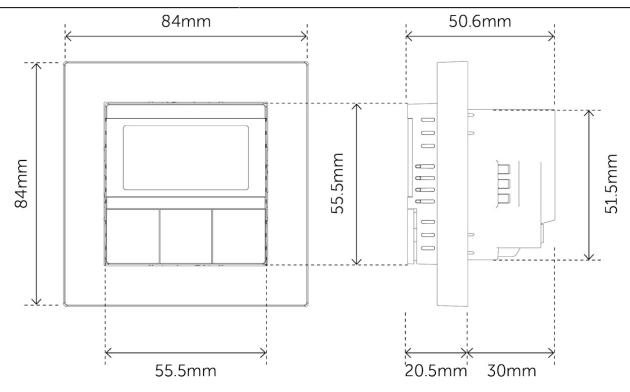

Product specifications may change without further notice.
