

# HEATIT Z-GATEWAY

Heatit Z-Wave Gateway is a smart home control unit with a modern and simple design.

This gateway allows you to control all Z-Wave devices in your home via tablet or mobile phone. The gateway is designed for easy setup and operation. With just a few clicks, you can easily add Z-Wave devices and create scenes. The settings are simple, but the possibilities are almost limitless.

Push notifications are supported, so you get notifications from your phone when an event is triggered in the smart home system, even when the phone is in sleep mode.

Voice control via Amazon Alexa and Google Home is also supported, and you can manage the system through voice commands.

The gateway has support for IFTTT, which makes it possible to integrate the gateway with almost any smart device on the market, as long as they have IFTTT support.

The Heatit Z-Wave gateway gives you endless opportunities to tailor your smart home to your specific needs.
